CAPITANA FONT FAMILY

Capitana is a Geometric Sans with humanistic proportions and open apertures. This means that all shapes are constructed from basic forms, the circle, triangle and square, and are designed according to the classic proportions of the Roman Antiqua. Distinct ascenders and pointed apexes with deep overshoot give it a cool beauty and classic elegance.

Capitana has a powerful opentype engine with small caps plus corresponding figures, tabular and oldstyle figures, arrows, alternate letters for g and a, as well as fractions, subscript and superscript. However, with its minimalist design and low contrast, it is best suited for on-screen use – meaning web design, user interface design (UI&UX), and app design.
